Dear Rusi,

Please find enclosed a text document that explains the data that i sent you last week.

I do urge you to come back to me with a statement, however brief, regarding your reaction to our attempts to replicate your results. I'd also urge you to let me know details of any positive replication attempts before its too late.

Your sincerely,  
Colin

Colin:

I am on travel and quite tied up but will get a brief note for the record to you tomorrow.

Rusi

Colin:

Per your request attached is a statement you requested. Let me know when your program is to be broadcast. Hopefully, it is a balanced report.

Rusi

(PS: since you've discovered the presence of one of the confirmatory efforts, and requested to do so, I've had a discussion with Dr. Tsoukalas. He "may" get back to you with a statement/feedback soon. FYI, other reports could be revealed soon - As a courtesy I've got a note to let you (and a few others that have requested) know of an impending confirmatory report in the public domain that I've helped with, only once the reveiws are done.)
