Dear Professor Tsoukalas,

I am looking into the bubble fusion research for a possible story for *Nature*. I am a freelance science reporter in Boston.

I would like to confirm that you were responsible for supervising the work of Adam Butt and Yiban Xu on the independent confirmatory experiment and maybe we could arrange a time to talk about your knowledge of that experiment. Any time would be good for me – please feel free to just let me know.

Thank you.

Best Wishes,
Eugenie
