Subject: Naranjo support from DARPA

Hi Bill and Jan,

Rusi Talekyarkhan has provided the following statement to me:

"I've talked recently with Coblenz and asked if he had commissioned Putterman to use DARPA funds to perform modeling/simulations of my PRL studies which were done not with external neutrons but with dissolved alpha emitters. He denied asking for/approving this."

If you or Jan Walker wish to provide any additional related comment to me, please do so within 24 hours.

Thank you,

Steve Krivit
