## E-Cat Weekly -- December 22, 2011

The past week saw around 30 unique stories posted about Andrea Rossi's E-Cat, including from at least 2 mainstream sources. The main highlights include talk about crowd funding of a 1 MW purchase; and reports of the Coherence 2011 conference in Rome where Francesco Celani reported achieving overunity with Ni-H fusion.

By Sterling D. Allan

Pure Energy Systems News

Once again we bring you a compilation of various news items about Andrea Rossi's E-Cat that have emerged since our December 15 compilation.

Mainstream news sources are indicated with the yellow highlight.

Newcomers: [ecatmotor.com](http://ecatmotor.com) | [fusioncatalyst.org](http://fusioncatalyst.org)

## • Replication

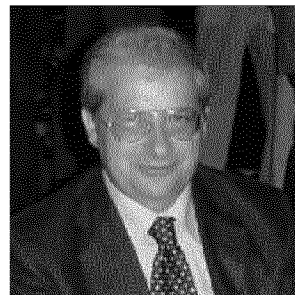

## o &gt;&gt; Rome, Dec. 14: COHERENCE 2011 (II)

(Original in Italian) - Daniele Passerni gives a report of the Coherence 2011 cold fusion conference held in Rome, Italy on December 14. "I offer now all the information I was able to collect... It's a lot of material to read, download, consult with calm during the weekend and beyond." (22Passi; December 16, 2011)

- **Top Italian Scientist Claims to Have Achieved Nickel Hydrogen Cold Fusion** - Italian physicist Francesco Celani stated that he has created low energy nuclear reactions similar to those achieved in Andrea Rossi's fusor. Celani told participants at the Coherence 2011 Cold Fusion Conference in Rome on December 14 that he had conducted cold fusion experiments using nickel and hydrogen. The [ecatfusion.com](http://ecatfusion.com) blog stated that Celani said he was able to create a "cold fusion cell" that yielded 200% excess thermal energy. (EnergyCatalyzer3; December 19, 2011)
- **New Information Emerges On Andrea Rossi E-cat** - A report provided by Daniele Passerni of 22Passi blog stated that there are new developments regarding cold fusion in what may have lead to proving Andrea Rossi E-cat as a valid technology. ...Celani said that for a couple of weeks, cells are now operating and are estimated at 200% excess heat range... (AndreaRossiECat; December 19, 2011) (And [ecatfusion.com](http://ecatfusion.com) and [ecatreport.com](http://ecatreport.com))
- **Italians At Coherence Conference Defend LENR and E-Cat** - I don't know if you have noticed it or not, but there is a great deal of Italian scientists, engineers, physicists and chemists participate in the E-Cat saga and the LENR epos as a whole. I mean look at the names involved - Andrea Rossi, Sergio Focardi, Giuseppe Levi, Domenico Fioravanti, Francesco Celani, Francesco Piantelli... (ECatHome; December 19, 2011)
- **NOTE:** Hank Mills says that the test that produced 200% was in 2004. The latest test produced a 15% gain. It also shows that Miley produced a 200% gain back in 1997 with nickel beads and light hydrogen. "There have been thousands of successful cold fusion tests that produce results nowhere near good enough to produce anything remotely practical [compared to the E-Cat]. This is simply yet another, IMO." <http://lenr-canr.org/acrobat/CelaniFsviluppod.pdf>

## • Customers

- o **Rossi: the 1 MW E-Cat will be ready in a few months** (Original in Italian) - Andrea Rossi denies rumors that more than 13 E-Cat 1 MW have already been sold and are in the process of delivery; but that indeed many inquiries have been made. (GreenStyle.it; December 16, 2011)
- o **Interesting Crowd Funding E-Cat Test Proposal** - Thanks to all who have made intelligent comments on yesterday's thread about a crowd funding approach to E-Cat testing. It seems there is some interest in

Francesco Celani

the idea, but also plenty of reticence. A recent post by Elias Freitas caught my attention and seemed worthy of featuring in a new post as it sums up the case for a crowd funding approach which I will call "The People's E-Cat Test". (*E-CatWorld*; December 16, 2011)

- **Rossi Responds to Consortium Purchase Idea** - It would be a very large undertaking to make this idea work. In addition to the daunting task of raising funds to purchase the plant, you would need be able to convince Rossi that you have the expertise to run it, and a purpose for its use — and a place to put it! As many readers have stated, you would need to have a legal organization in place to receive funds and run the project, and professionals who could do the testing — all of which would take substantial funds over and above the purchase of the E-Cat Plant. (*E-CatWorld*; December 16, 2011) (and *AndreaRossiECat* and *ecatmotor.com* and *ecatreport* and *ecathome*)
- **On the Hunt For The Catalyst: Open Catalyst Crowd Project Forms to Advance Cold Fusion** - Here is an interesting announcement that was posted on the Vortex-I list from Dutch physicist Bastiaan Bergman who has just launched a crowd-based cold fusion/LENR project. "I'm excited to announce our newly formed non-profit organization to the advancement of cold fusion. We are planning an open catalyst project geared towards finding the secret catalyst needed to achieve nuclear fusion in the solid state. The plan is to use the power of the crowd to search and try the many different possibilities in a highly paralleled and fast way. By installing many many reactor-calorimeters in labs of participating scientist all over the world and by sharing all data in a structured way we envision an enormous advantage compared to the individual approach. (*E-CatWorld*; December 20, 2011)
  - >> **FusionCatalyst.org** - Bastiaan Bergman has launched an "Open Catalyst project, to crowd search for the secret catalyst that enables LENR"
  - **Cold fusion: crowdfunding to test the E-Cat 1MW** (Original in Italian) - Frank Acland is proposing that a group of private citizens collect the \$3 million to buy a 1 MW plant and set up a test, to bring the information about the test and performance into the public. (*GreenStyle.it*; December 19, 2011)
  - **US Military: A Credible Candidate As eCat Customer?** - The following presentation was given by SPAWAR (US Navy) in May 2009. It details some of their cold fusion research to that point and is interesting for a number of reasons. For the scientifically minded among you, I recommend watching the complete video and for those who ... (*eCatNews*; December 16, 2011)
- **Production**
  - **Scam or Cleantech Revolution: Rossi's "cold fusion"** (Original in German) - In medicine, the principle "He who heals is right." For Rossi, the same technology applies: He who produces sustained energy without the radioactive waste at room temperature, is also right. (*CleanThinking.de*; December 18, 2011)
- **Applications**
  - **Rossi E-Cat Versus Industrial Boiler Systems** - This is exactly what all the boilers need – a low cost e-cat energy! (*AndreaRossiECat*; December 15, 2011) (and *ecatreport*)
- **Theory**
  - >> **Theoretical Feasibility of Cold Fusion According to the BSM Supergravitation Unified Theory** (back-up) (by Stoyan Sarg Sargoytchev) - Advances in the field of cold fusion and the recent success of the nickel and hydrogen exothermal reaction, in which the energy release cannot be explained by a chemical process, need a deeper understanding of the nuclear reactions and, more particularly, the possibility for modification of the Coulomb barrier. The current theoretical understanding based on high temperature fusion does not offer an explanation for the cold fusion or LENR. The treatise "Basic Structures of Matter - Supergravitation Unified Theory", based on an alternative concept of the physical vacuum, provides an explanation from a new point of view by using derived three-dimensional structures of the atomic nuclei. For explanation of the nuclear energy, a hypothesis of a field micro-curvature around the superdense nucleus is suggested. Analysis of some successful cold fusion experiments resulted in practical considerations for modification of the Coulomb barrier. The analysis also predicts the possibility of another cold fusion reaction based on some similarity between the nuclear structures of Ni and Cr. (*viXra:1112.0043*; December 14, 2011)
- **Credibility**
  - **E-cat Motor Ready for Scientific Investigation** - Rossi made it clear that his controversial e-cat motor is ready for scientific investigation but only when he gets his patent protection. [which will be a while] (*ECatMotor*; December 20, 2011)
- **Commentary**
  - **New Years Predictions for Cold Fusion** - 1) Customers will verify that Rossi's E-Cat truly works, 2) Defkalion will show a working system and enter the market, 3) The understanding of the reaction methodology will expand with multiple ways to make significant CF reactions, 4) There will be multiple fuel and catalyst recipes, 5) While producible results will increase, the push-back from government will stiffen and the year will in a huge regulatory quagmire. (*NickelPowder*; December 21, 2011)
  - **Bad JuJu and Plan X** - A rant from Tom Bacceti, who is depressed about the lack of traction cold fusion is getting. (*e-CatSite*; December 20, 2011)
  - **Cold Fusion For Christmas?** - I doubt it. Not this year anyway. However, after a seemingly disappointing period of no significant news regarding the cold fusion saga, mid-December has found this story once again springing to life. Last week Republican presidential candidate Mitt Romney mentioned cold fusion in an interview. (*e-CatSite*; December 17, 2011)
  - **Rossi vs. the Pathoskeps: All Cheese, No Steel** Pathoskep is a word I made up. Somewhere in the wee hours scurrying down paths of knowledge pursuing the White Rabbit, I came across a description of false science, vigorously defended by some dogmatic scientific fundamentalists as "pathological science". (*e-CatSite*; December 15, 2011)
- **E-Cat History**
  - **Peak E-Cat** - Interest is waning. You can perceive that clearly from the activity of the various sites dealing with it; while "Google Trends" confirms that the trend is indeed down. After a flare of curiosity that peaked in [October 28] 2011, people found that there was nothing to see about the E-Cat except some purported "demonstrations" that didn't really demonstrate anything. So, they lost interest. (*Peak Oil*; December 18, 2011)

"e-cat" 1.00

- **FALSE > E-cat Motor Inventor Works for US Department of Defense** - [The following was allegedly asserted at the Coherence 2011 cold fusion conference held in Rome, Italy on December 14] Andrea Rossi actually worked for US Department of Defense since 2008. It was reported that the Italian physicist has closely worked together with US Air Force scientist Brian Ahern for a project that was not

explained further. (*ECatMotor*; December 19, 2011)

- On December 21, 2011 5:18 PM, Andrea Rossi wrote: "This is totally false. I did not work for the DOD since 2008, and I never worked with Brian Ahern. Actually, I never met or talked with Brian Ahern in all my life. Please pass this on to all the blogs who write these stupidities." [I would have sent this privately but ECatMotor.com provides no contact info.]
- **Interesting Posts at Rossi's Blog** - 1) As December 17, 2011, JNF was partially down. Rossi stated that the Journal had been attacked and was unavailable. 2) Rossi plans to publish the theory behind e-cat and presumably details of its operation when he gets patent protection. 3) He will make e-cat available for scientific investigation when he has legal protection for his invention. ... (*ColdFusion3*; December 17, 2011) (and *ecafusion* and *ecatreport*)

- **Other Cold Fusion Competitor News**

(Typically also mention E-Cat)

- **Energy Catalyzers: Rivals Arise to Rossi's E-Cat** - Cold fusion has been making a comeback this year. The E-Cat reportedly fuses nickel and hydrogen at low temperatures to release heat energy and shows that cold fusions isn't as dead as many scientists seem to think. Impulse Devices, a California based company, is exploring sound driven fusion. Star Scientific Limited is using a reaction called a muon catalyzed fusion. The Australian company uses a subatomic particle called the muon to fuse two hydrogen atoms together. Star Scientific claims it's working toward "economically and constantly producing pions, which immediately decay into muons." (*International Business Times*; December 19, 2011)
- **Cold fusion, Francesco Celani was the key of E-Cat** (Original in *Italian*) - On 14 December in Rome was held an international conference on cold fusion. Notably absent was Andrea Rossi, the famous father of E-Cat. Among the more detailed reports of this conference, we remember those published by Daniele Passerini. Many interventions of great interest, but the highlight was undoubtedly that of the Italian physicist Francesco Celani, which came the echo even in the USA. (*GreenStyle.it*; December 21, 2011)
- **Defkalion**
  - **Defkalion's Insider Talks to Jed Rothwell** - "Defkalion asked an independent expert to contact me and discuss some aspects of the company and their technology. This person is well known to me and I trust him completely. ... The engineering and business operations at Defkalion are highly promising. These people are highly professional. Their science and engineering are first rate. Their laboratory equipment is first rate. Their upcoming products are revolutionary. They are the best LENR implementations ever produced. The expert says the prototype products are consistent with the specifications described in the web site." (*eCatNews*; December 21, 2011)
    - **Defkalion Opens Doors to "Independent Expert"** - Jed Rothwell, writing on Vortex-1 reports of communication he has had with an "independent expert" (who for now wishes to remain anonymous) about a lengthy visit made to Defkalion Green Technology's premises in Greece to look at progress made on DGT's Hyperion products. (*E-CatWorld*; December 21, 2011)
  - **Defkalion Ducks Accusations** - There is an interesting conversation on Defkalion GT's forum regarding the accusations from Christos Stremmenos that seem to imply that the company is acting dishonestly. This is important because DGT continues to say that Stremmenos is on their Board of Directors. Jed Rothwell asked them the question... (*eCatNews*; December 20, 2011)
  - Received by email:

21<sup>st</sup> December 2011  
Athens, Greece

Dear prospective client / partner,

The past year witnessed ground breaking developments in LENR. Many believed in, and hoped for, all-encompassing disruptive changes. Indeed, this has been a unique period in history with great expectations. Defkalion Green Technologies remains at the forefront of this trend.

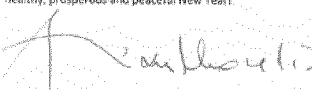

We thank you for your interest and support in our progress. The efforts of many here at Defkalion Green Technologies have been motivated by this – your – positive attitude and encouragement.

We continue to work with responsibility, diligence, and commitment towards Hyperion's successful market entry in 2012. Our goal is not a race against time. We aim to ensure the market receives Hyperion as a safe, verified, and fully-functioning product.

While all our team continues with dedication, we would like to wish you warm Seasons Greetings and a very Merry Christmas. We look forward to renewing our business partnership discussions for your country after the entry of the New Year 2012.

As 2011 was labeled the year of the Aion, we hope 2012 will become the year of LENR's commercialization!

On behalf of all of us here at Defkalion, we send to you and your family our kind wishes for a healthy, prosperous and peaceful New Year!

  
Alexandros Xanthoulis  
CEO  
Praxen Defkalion Green Technologies Global Ltd.

- **General Cold Fusion News**

(Typically also mention E-Cat)

- **US Senate candidate Randy Hekman puts LENR first** - The Michigan US Senate race includes over half-a-dozen Republicans vying for Democrat incumbent Debbie Stabenow's long-held seat, but only one has LENR on their platform. Former Juvenile Court Judge Randy Hekman has a long history of association with LENR science. He formed his own company in 1996 to provide energy research and consultation for LENR. "I am VERY skeptical of Mr. Rossi's work, based on his excessive secrecy and his sketchy background." (*ColdFusionNow*; December 20, 2011)
  - **US Senate Candidate on LENR and Rossi's eCat** - Ruby Carat at Cold Fusion Now has posted an interview with US Senate candidate Randy Hekman about LENR. [commentary given] (*eCatNews*; December 21, 2011)
- **Cold fusion: Shell is interested** (Original in *Italian*) - E-Cat nemesis, Steven B. Krivit reports that Shell is seriously interested in research on LENR reactions. So, one of the largest and most powerful multinational energy of the planet will be funding research in this direction. (*GreenStyle.it*; December 20, 2011)
- **SPAWAR Cold Fusion Research At Risk** - According to Jed Rothwell, cold fusion researcher and owner of the LENR-CANR.org website, the US Navy has closed down cold fusion research at its Space

and Naval Warfare Systems Command. (*eCatNews*; December 18, 2011)

- **Jed Rothwell Reports Cold Fusion Research Shut Down at the US Navy's SPAWAR Program** - Rothwell believes that recent media attention surrounding cold fusion is the likely cause of the closure of the program. according to Andrea Rossi, representatives of SPAWAR were present at his October 2nd E-Cat demonstration on Bologna. (*E-CatWorld*; December 19, 2011)

BP has declared that it will be shutting down its solar PV research unit, declaring that it has been found to be non-profitable. Could it be that the e-cat/LENR/cold fusion is already making headway into corporate levels? Are BIG Energy already convinced that LENR is already with us and that there's no more point in pushing expensive solar and wind energy?

It is only logical that once LENR, through Rossi's e-Cat, or Defkalion's version, is confirmed officially by the scientific community, it will kill all sorts of investments in expensive green energy. BP and Shell may be already there.

The future is cold fusion, which is urgently needed for the coming global freeze. Solar scientists are telling us that we are in for 50 years of cooling.  
[http://blogs.news.com.au/heraldsun/andrewbolt/index.php/heraldsun/comments/50\\_years\\_of\\_cooling\\_predicted](http://blogs.news.com.au/heraldsun/andrewbolt/index.php/heraldsun/comments/50_years_of_cooling_predicted)

Its got nothing to do with LENR. Solar PV is a dead horse, economically. Practically every factory and, consequently, most research outside of China will be shut down within the next two to four years. Many of the big ones in the western hemisphere are under Ch11 already - or somewhere very close to it. Its low margins - not fusion.

Solar PV companies are going bankrupt because China is flooding the market with panels they are selling below cost.

LessEMF.com is the place to buy Gauss meters, RF meters, shielding.

Poor Man's Guide to Wind and Battery Power

**ADVISORY:** With any technology, you take a high risk to invest significant time or money unless (1) independent testing has thoroughly corroborated the technology, (2) the group involved has intellectual rights to the technology, and (3) the group has the ability to make a success of the endeavor.

All truth passes through three stages:  
First, it is ridiculed;  
Second, it is violently opposed; and  
Third, it is accepted as self-evident.  
-- Arthur Schopenhauer (1788-1860)

"When you're one step ahead of the crowd you're a genius. When you're two steps ahead, you're a crackpot."  
-- Rabbi Shlomo Riskin, (Feb. 1998)
